

Assignment Overview

The assignment involves the creation of a website using an online website development platform. The provided website is named **"BhavyaSri WowKitchen"**, and it is hosted on **Wix**.

Website Features

1. Home Page:

- The homepage provides an entry point into the website.
- Users can log in to their accounts by clicking the "Log In" button.

2. Menu Page:

- Clicking the menu option redirects users to the **Menu page**, where they can browse available food options.

3. Reservations Page:

- Users can navigate to the reservations section to **book tickets or reserve tables**.

4. About Page:

- Provides information about the restaurant/hotel.

5. Contact Us Page:

- Includes contact details.
- Features an **AI assistant** to help users with queries.

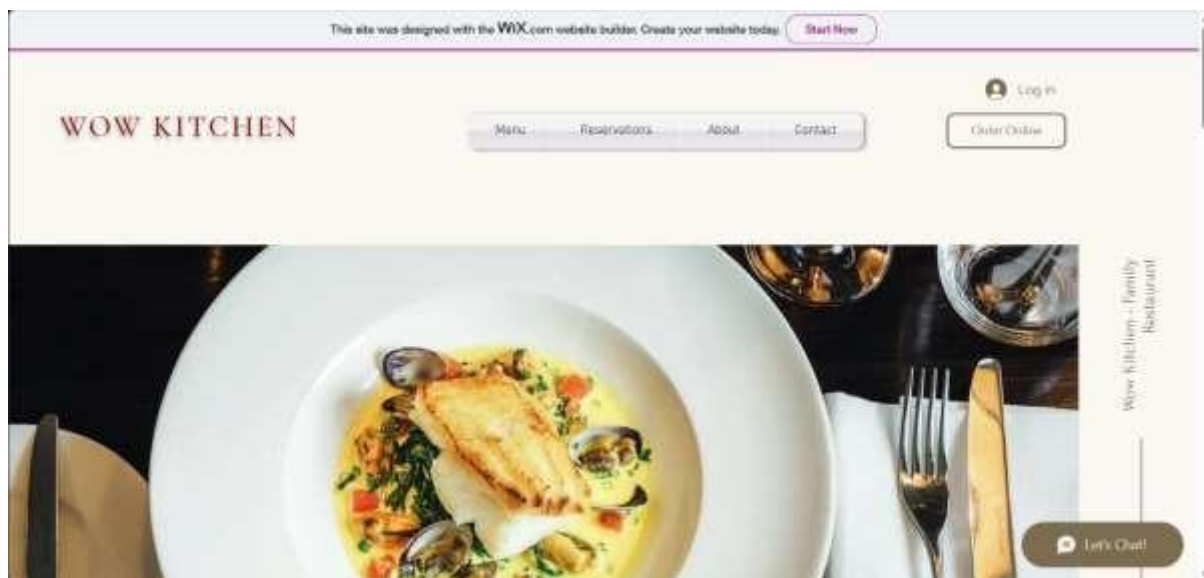

6. Scrolling Features:

- While scrolling, users can see:
 - A redirection to the **Menu page**.
 - A redirection to the **About page**.
 - An option to **book tickets**.

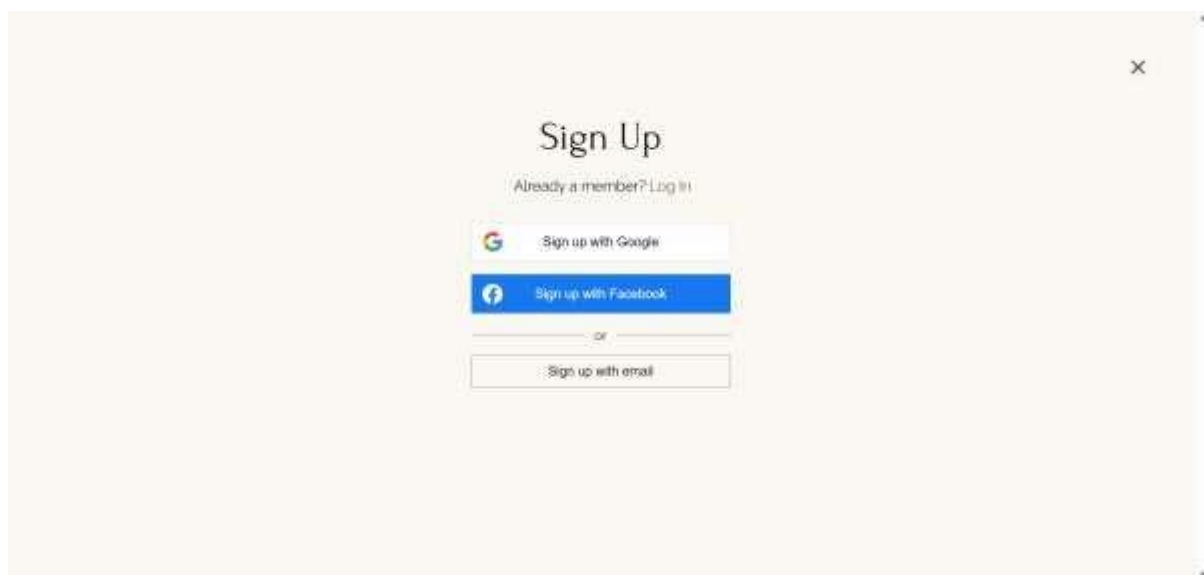

7. Footer Page:

- Contains additional navigation and information.

Home Page Of the Website:

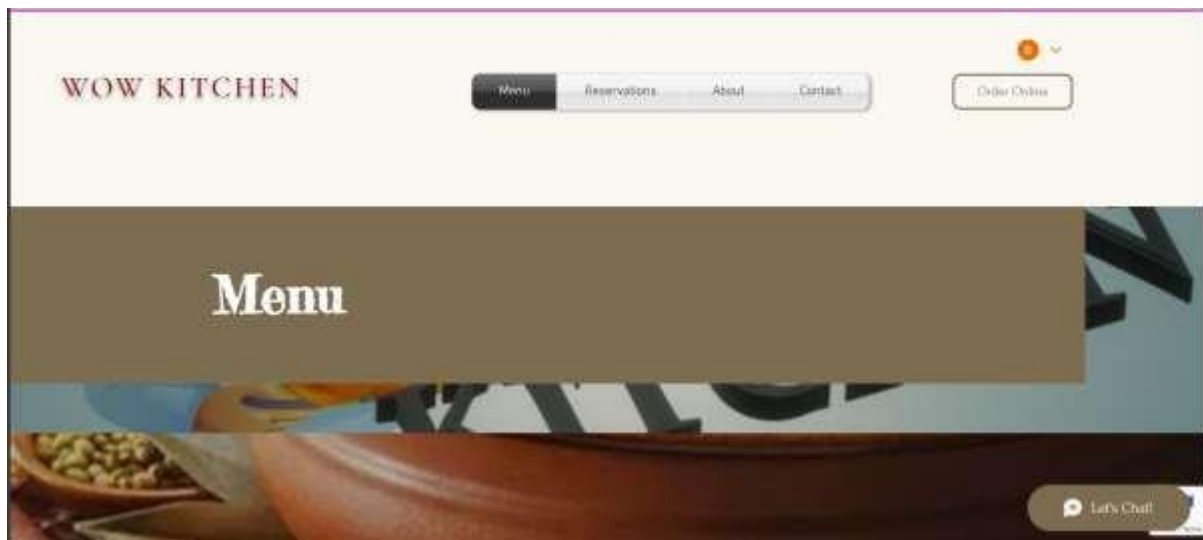

After clicking the log in

So we can login into account

After clicking the menu it redirect to menu page:

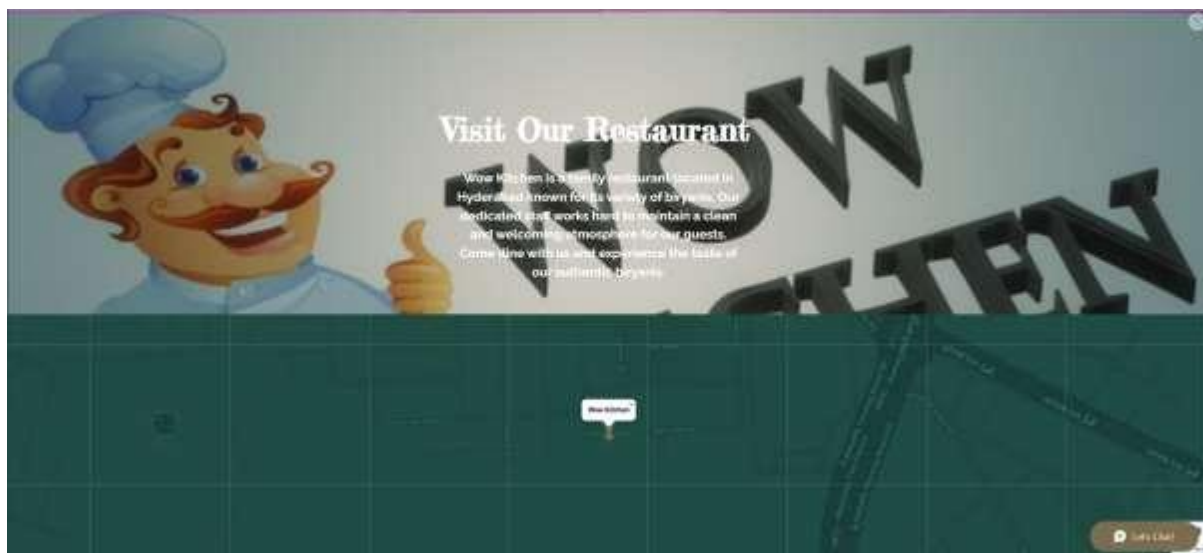

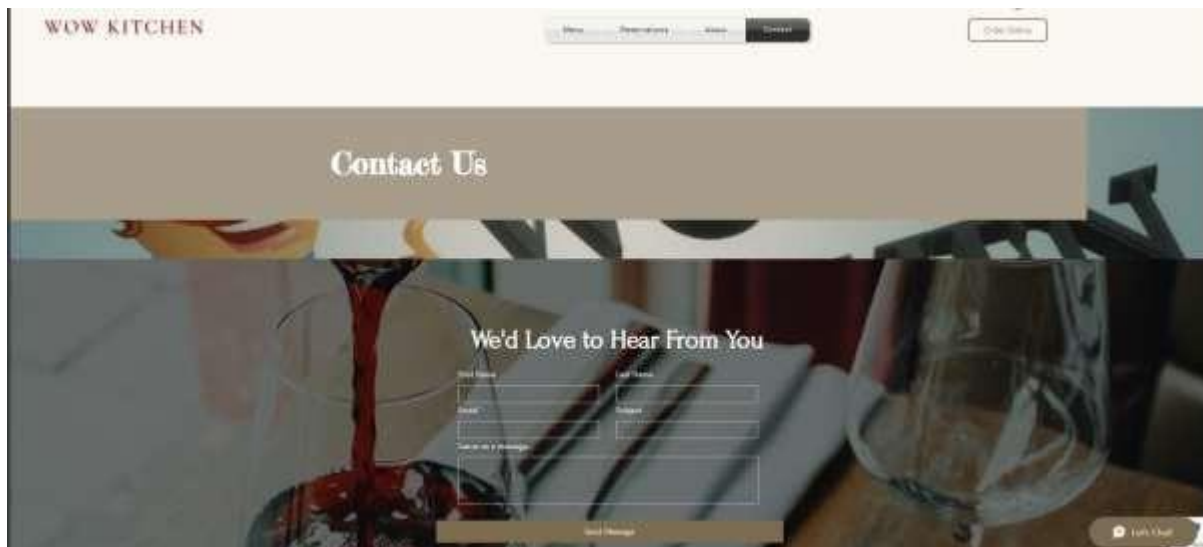

After clicking reservations it redirect to

After clicking About

If we click contact us:

There is a AI assistant

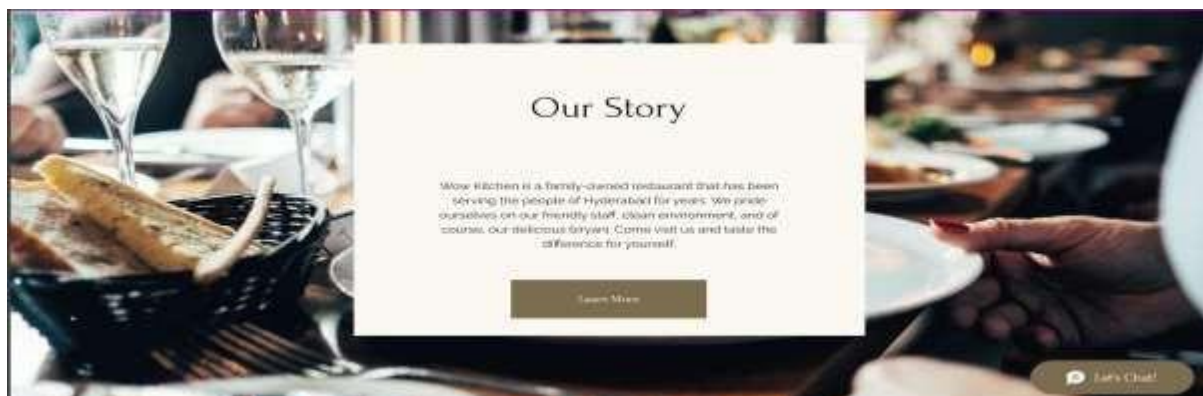

If we scroll down these are things we observe:

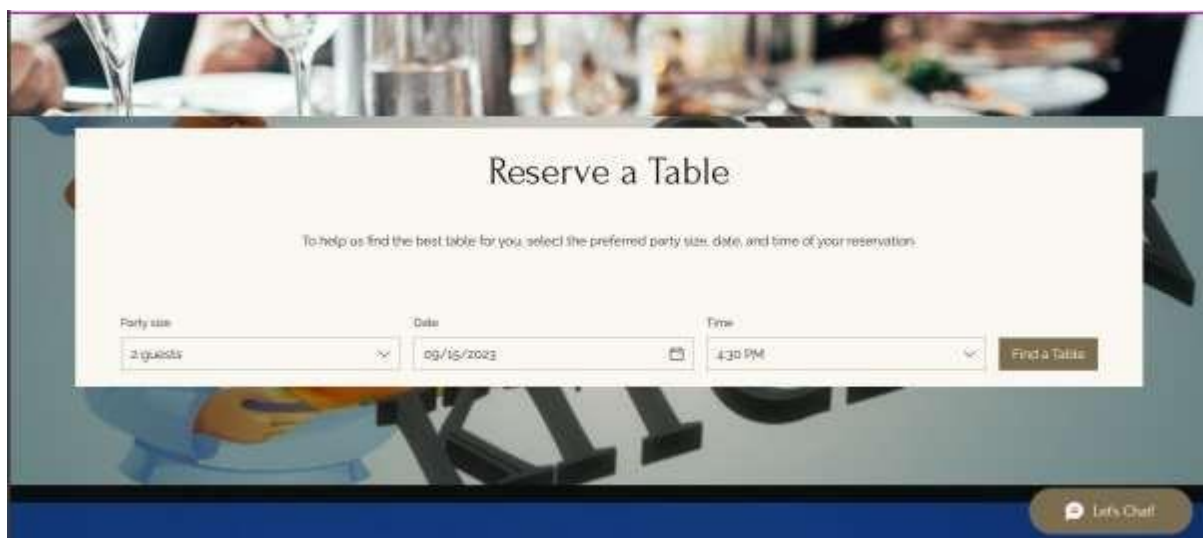

This redirects to Menu page

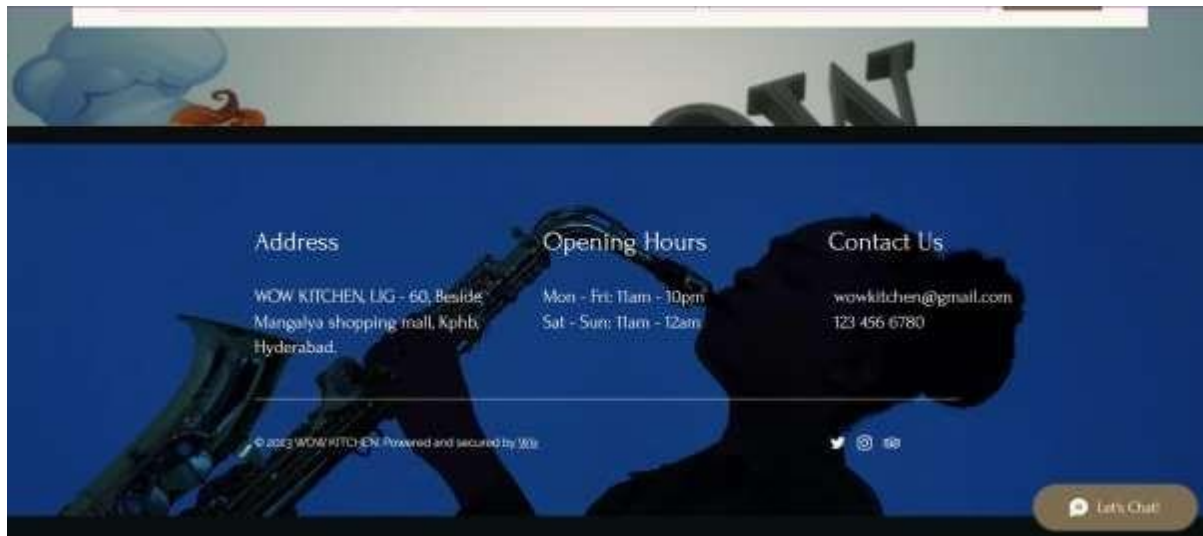

This Redirect to the about hotel

We can book the tickets here:

Footer Page

Website link:
